Bazaar Activity

- Deploy an agent in a web chat server!
- <http://erebor.lti.cs.cmu.edu/bazaar/BazaarAgent.zip>
- **Activity::**
Customize the example agent for a task in your course.
Full instructions and documentation are included in the .zip
 1. Get the example agent running in your course.
 2. Explore the settings to make domain-appropriate adjustments and additions.
All the relevant config files are lovingly documented.
 3. Propose some brand-new behaviors that would be useful for your course.

Get the agent running!

- Join your chat room via OLI: `bazaar..lti.cs.cmu.edu:80/chat/<your chat room name>/<your account id>`
- Double-click BazaarAgent.jar in the BazaarAgent folder.
- Enter `<your chat room name>` in the “Room Name” field
- Press the big friendly button!

Room Name:

What does it do?

The image shows a screenshot of a software interface titled "Bazaar Agent". The interface includes a "Conditions:" section with several checkboxes: tutorial_trigger, agree, say_more, social, explain, participation, and revoice. Below this is a "Room Name:" field containing the text "Hello Bazaar". At the bottom of the interface are three buttons: "Start Agent", "Wizard", and "Stop Operation & Quit".

Four callout bubbles are overlaid on the interface:

- A purple bubble on the left points to the "tutorial_trigger" checkbox and is labeled "Hierarchical Dialogues".
- A yellow bubble at the top points to the "social" checkbox and is labeled "Social Support".
- A light blue bubble on the right points to the "revoice" checkbox and is labeled "Accountable Talk".
- A light green bubble at the bottom right points to the "Wizard" button and is labeled "Wizarding + Monitoring".

What can you change?

- Replace the Accountable Talk exemplar statements (and associated synonym files) with statements relevant to your own domain.
In the “accountable” folder.
- Edit the macro-script or tutorial dialogues, or create new ones. *In the “plans” and “dialogues” folders.*
- Remove any behaviors you think are unsuitable.
In properties/operation.properties
- Adjust the timing, priority, etc. of any of the included behaviors. *In the “properties” folder.*

The Solution

About LTI

- open specification developed by IMS Global Learning Consortium
- universal standard of integration rich educational content from a third-party service to an LMS
- allows building a standard plug-in for all CMS systems

What do we get from LTI?

How LTI

works

- Launch external tool
- Get graded result (optional)

Security:

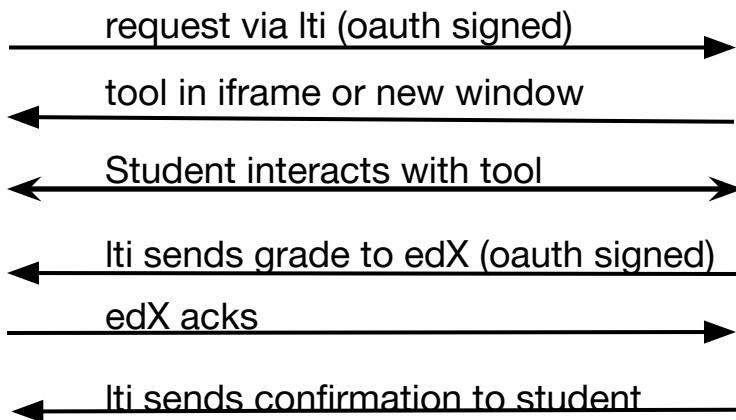

- Shared secret
- OAuth signing

User's experience:

- iframe
- new browser window

LMS

Learning tool

Bazaar

LTI and edX Studio

- Obtain LTI Information
 - launch URL
 - LTI Passports
 - LTI ID
 - client key
 - client secret
- Create an LTI Component
 - Add LTI to the Advanced Module List Policy Key
 - Register the External LTI Provider
 - Add the LTI Component to a Unit
 - LTI ID
 - Scored
 - Weight
